recyclable reusable cup

- 100% recyclable polypropylene
- EcoCore insulated core
- durable and dishwasher safe
- lightweight
- microwave safe
- 36x less likely to go to landfill

Zero waste cup, by Bockatech, offer a great solution to the massive environmental problem that to go coffee cups cause. The plastic inner liner in most paper cups prevents them from being recycled resulting in 160 billion going to landfill and increasing each and every year.

Made from polypropylene, Zero waste cups are reusable, recyclable, insulated, strong, have a lifespan of over 1000 uses, reduce environmental impact by creating less harmful co2 than any alternatives and 96% less than normal paper cups.
